

Friday – Sunday, September 14-16, 2012

Organizers:

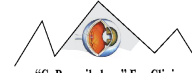

Scientific Institute,
San Raffaele, Milan, Italy

**Hôpital ophtalmique
Jules-Gonin**
Service universitaire d'ophtalmologie
Fondation Asile des aveugles

“Jules-Gonin” Eye Clinic,
Lausanne, Switzerland

“G. Papanikolaou” Eye Clinic
Thessaloniki General Hospital, Greece
Chairman: A. Nikolakopoulos

“G. Papanikolaou” Eye Clinic
General Hospital,
Thessaloniki, Greece

FINAL PROGRAM

Scientific Program:

- Friday, September 14th: 08:30-18:00
- Saturday, September 15th: 08:30-18:00
- Sunday, September 16th: 08:30-13:00

Social Program:

- Thursday September 13th : **Reception** at the Hotel
- Saturday, September 15th: 19:30 **Beach Volley** Medical vs Surgical Team followed by **BBQ Beach Party**

SPEAKERS & TOPICS – MORNING SESSIONS

Balta F., Romania: Vitreous hemorrhage in MIVS era.
Diabetic retinopathy.

Bandello F., Italy: Update in myopic CNV treatment.
Current Anti-VGF therapy results.

Cranias G., Greece: Flashes and floaters. Differential diagnosis.

El-Rakhawy K., Egypt: Macula hole surgery and ILM removal techniques

Fasolino G., Italy: Laser and diabetic retinopathy.
OCT, ICG, Current indications.

Ferrara V., Italy: Current management of retina vascular obstruction

Forlini C., Italy: Iris reconstruction

Gotzaridis S., Greece: Dislocated intraocular lenses

Guarnaccia G., Italy: Postgraduate education in ophthalmology. ESASO new projects

Kaskaloglu M., Turkey: Retractive lenses in high myopia

Kaynak S., Turkey: Vitreoretinal treatment of cataract complications

Nikolakopoulos A., Greece: Primary Retina detachment surgery for beginners.

Reppucci V., U.S.A.: Finding the retina hole.
Is buckle treatment still useful?

Riemann C., U.S.A.: Engineering and physics for vitreoretinal surgery.

Ripandelli G., Italy: Current OCT diagnosis. What has changed?

Teixeira S., Portugal: Fundus examination and diagnosis for retinal disorders in children.

Theodosiadis P., Greece: Vitreoretinal interface in macula diseases.

Toygar B., Turkey: Femto laser cataract surgery is coming.

Zografos L., Switzerland: Diagnosis and management of intraocular tumors.

AFTERNOON SESSIONS – WET LABS operated by MTS

There will be 8-10 microscopes and vitrectomy machines using wide angle EIBOS non-contact observation systems and others performing only 23G and 25G MIVS vitrectomy.

Topics:

- Getting in the position to see the fundus trocal placement.
- Vitreous hemorrhage vitrectomy
- Lensectomy – treating lense complications for the cataract surgeon – use of the side ports and the infusion as a maintainer.
- Foreign body removal
- Primary vitrectomy in retina detachment
- Fluid air exchange
- Perfluorocarbon
- Silicon oil injections
- How to inject medicines into the eye etc

Wet Lab Coordinators

Panidou I., Greece
Fadel E., Greece
Papadopoulou C., Greece

Instructors' Coordinator

Parikakis E., Greece

Instructors:

- Charonis A., Greece
- Fadel E., Greece
- Gotzaridis S., Greece
- Liazos E., Greece
- Manousakis E., Greece
- Mavrikakis E., Greece
- Nikolakopoulos A., Greece
- Panidou I., Greece
- Papadopoulou C., Greece
- Parikakis E., Greece
- Stavrakas P., Greece
- El-Rakhawy K., Egypt
- Ferrara V., Italy
- Forlini C., Italy
- Kaynak S., Turkey
- Mura M., The Netherlands
- Riemann C., U.S.A.

DRY LABS:

Vitrectomy and ILM removal from artificial eyes using 23G and 25G special forceps.

Medical Retina Labs:

Instructor: Datsaris I., Greece

Practice on Spectralis and UBM paradigm

- Fluroscein and simultaneous OCT and ICG

UBM current dry detection technique in anterior chamber pathology

Instructor: Chaidoulis S., Greece

Industry Presentation by Möller-Wedel

Recent developments in microscopes and EIBOS II indirect wide angle observation system

Dr. Koetke J., Germany

Industry Presentation by Amvis

Presentation of the new Resight 700 Microscope
